MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY REVIEW AND MACRO ECONOMY

The Indian economy is set to being the fastest growing major economy in the world in 2012. This is expected to result from continued high demand in India. The economy has benefited from robust domestic demand and a revival in investor and consumer sentiment although higher interest rates are expected to shave off a few basic points from the overall growth rate.

Indian economy stands today as one of the influential and attractive economy. India has maintained growth rate of above 5% even in times of global recession.

The slowdown in 2011-12 is attributable to the global factors like the slowdown in the world economy, eurozone crisis, hardening of crude oil prices in the international market and domestic factors such as decision to battle inflation by tightening monetary policy and cutting back fiscal stimulus. Headline inflation continues to remain a matter of concern.

The Indian automobiles industry was adversely impacted by the general economic conditions in the country and across the globe in 2012. However, healthy growth prospects and strong fundamentals of the Indian economy would drive the auto industry's growth in the year ahead.

The expected moderation in interest rates would also give the much needed boost to sales in the year ahead. The industry as a whole is expected to gain significantly from the various initiatives on infrastructure development and the improved road infrastructure. The automobile industry will stay stable alongwith competition-led pricing pressure.

The Indian auto components sector in 2013 is expected to perform well on the back of demand from OEMs(Original Equipment Manufacturers).

Though the sales for the whole year went down as compared to last year, still Bharat Seats Limited (BSL) was able to close the year with good sales recovery in the last quarter of the financial year: 2011-2012.

FUTURE OUTLOOK

The automobiles sales is expected to increase in 2013 over 2012.

MSIL sold 11,33,695 vehicles in fiscal 2011-2012. The total sales in March 2012 are the highest monthly sales in the Company's history.

BSL is well positioned to exploit the growth opportunity. Your company has acquired Land in the Vendor Park of Maruti Suzuki India Ltd, Manesar and has started construction of the building to house a complete Seat manufacturing plant. This has enabled the presence of your Company in the Vendor parks of Maruti Suzuki India Ltd in the Gurgaon unit as well as the Manesar Unit.

Your Company has entered into another area of manufacture of extruded components for Maruti range of vehicles and is setting up its production facility at Borakalan in Haryana.

RESEARCH & DEVELOPMENT

Indian auto suppliers' credit profiles would largely remain stable in 2013, underpinned by the increasing focus of OEMs on localization. BSL has been trying to gear up its resources to provide complete solution, from design to start –of –production(SOP), to customer in order to keep abreast with competition.

This initiative has been taken by creation of necessary infrastructure in terms of establishing prototype shop, designing assembly line, welding line and automatic moulded carpet line and providing training to human resources.

In process we have created inhouse expertise for product and tool design and development of components in order to remain cost competitive.

OPPORTUNITIES AND THREATS

During the year, your Company focused its attention on long term initiatives despite challenging market situations, with special focus on Research and Development.

Besides, passenger car industry, your Company has focused its attention on design and development of Seating System and components for two wheelers of Suzuki Motor Cycle India P.Ltd. (SMIPL). During the year, BSL has supplied seats and complete frames for a new model of motorcycle launched by SMIPL.

The company has been selected for development of Seating system, moulded carpet and luggage carpet for new Models of MSIL.

RISK AND CONCERNS

The management perceives the following as risk and concern for its business :

BUSINESS RISK

The Company is operating in the business of automotive components and the performance of auto component industry is largely dependent on the performance of automobile industry. The Company operates in an environment which is affected by various factors some of which are controllable, while others are outside the control of the Company. The Company is dependent on several factors such as changes in Government policies & legislation, economy's growth, monsoon, market practices and pricing etc. The global automotive manufacturers are expanding their production capacities in India, leading to global competition which can only be countered by maintaining low cost product development.

Although rising inflation, interest rates and crude oil prices are concerns of short term, the Company is optimistic about medium and long term and is gearing up for growth. The Company is actively exploring all new business opportunities in terms of product diversification.

FINANCIAL RISK

The Company is exposed to the risks associated with fluctuations in foreign currency rates on account of imports and foreign currency loans. The company's sales and margins are subject to the market forces that affect Maruti and SMIPL. Your company reviews forward exchange contracts/ derivative contracts on a regular basis to analyse foreign exchange exposure and confirms that the Company has a policy on foreign exchange risk management in place.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Your Company has a proper and adequate system of internal control to ensure that all assets are safeguarded and protected against loss from unauthorized use or disposition and that the transactions are authorized, reported and recorded correctly.
